

Role of PMRA Committee Member

Your PMRA has an elected Management Committee that meets on a regular basis to discuss and pursue issues of mutual concern to you and all members.

Current issues before your committee are:

Meetings with Department of Transport, Marine Safety, to improve speed and navigation signage in the canals and to better manage noncompliance with speed and navigation rules.

Discussions with the City of Mandurah to implement arrangements to have operators of commercial vessels (ferries, charter boats, hire boats etc) contribute to the cost of canal maintenance.

Discussions with UWA to undertake a study into the deterioration of canal walls and the remedial cost for which individual owners are responsible/

Discussions with CoM and DoT regarding a permanent solution for sand by-passing at the entry to the estuary. This will impact on the cost of dredging the main canal. Currently 59% of the cost of dredging is a burden on Port Mandurah Ratepayers who have no input on the nominated dredging contractor nor the frequency of dredging.

Committee membership is not an onerous task.

Many current Committee Members have been involved for several years, but there is an urgent need for fresh ideas.

Monthly meetings take place in a board room setting and take about 1 hour.

Your PMRA needs Committee Members who are available, willing to contribute and keen to pursue initiatives that benefit all Port Mandurah residents.

If you fit that profile, then please give serious consideration to nominating for Committee membership at the AGM,

A link to the nomination form is below.
